Los Angeles, California

Objective: Currently looking for an entry level Python engineer position. Eventually I hope to move into a cloud automation type role. I'll have my AWS SysOps certification in 2017.

Skills

Python, AWS, Bash scripting, MongoDB, Nginx, Docker, Jenkins

Projects

<http://mehemken.io>

2017

A Flask application generates a set of static pages. A custom CLI allows me to easily test and push my code to GitHub. I run a Jenkins server in AWS that polls the GitHub repo and deploys when it sees new code.

- **Tech:** Python, Flask, Pytest, EC2, Jenkins

Int'l Jiu Jitsu Education Fund

2017

Set up a WordPress site on AWS. It is served up by Nginx on an Ubuntu AMI. IJEF provides free Brazilian jiu-jitsu education for underprivileged children around the world.

- **Tech:** EC2, Nginx, Stripe
- **Site:** <https://www.i-jef.org/>

Leadership

AWS Certification meetup, *Founder and host*

May 2017 - Present

I started a meetup for people to come together to study for their AWS Certifications.

Python meetup, *Co-Host*

Dec 2016 - Present

I organize and lead a meetup for all skill levels. I help people find high-level solutions to problems they are currently working on with Python.

Employment

UCLA External Affairs, *Prospect Management Help Desk*

Feb 2015 - Present

Responsible for servicing 40 salespeople. Responsibilities include an initial training on the CRM Software and recurring refresher trainings. Also responsible for answering questions from our phone line and email and facilitating projects with our Research and Analytics teams.

- **Tech:** Blackbaud CRM, Excel

UCLA External Affairs, *Data Analyst Intern*

Summer 2012

Evaluated the efficacy of various fundraising methods by evaluating gift data.

- **Tech:** Excel

Academics

UCLA, *BA Sociology*

2008 - 2014
